## RESEARCH INTEREST

---

*Robotics, 3D Vision, Serving System*

## EDUCATION

---

### Tsinghua University

Ph.D. Student in Computer Science, Advisor: Zhi Wang

08/2024 – Current

### Tsinghua University

M.E. in Computer Technology, Advisor: Zhi Wang

08/2020 – 06/2023

### Beijing Normal University

B.S. in Computer Science and Technology

09/2016 – 07/2020

## EXPERIENCE

---

### 3D Gaussian Splats Compression

Tsinghua SIGS, 10/2023 – Current

*Post-training 3D Gaussian Compression via Attribute Transformation*

[ECCV '24, ArXiv '24]

- Introduced Octree and RAHT to compress the 3D Gaussians.
- Proposed a block-wise way to quantize attributes and a well-crafted fine-tuning scheme to restore quality.
- Designed a tailored mixed-precision quantization for 3D Gaussians to further enhance the compression quality and implemented a CUDA module to accelerate the quantization process.

### Multiple MLaaS Inference

Tsinghua SIGS, 07/2020 – 08/2023

*Multicloud-based Analytics*

[INFOCOM '22, TMM '24]

- Measured the performance (e.g., accuracy, throughput, and latency) of machine learning inference services (mainly object detection services) on AWS, Azure, Google Cloud, and Alibaba Cloud.
- Found the higher cost but occasionally lower accuracy problem under the multi-cloud environment and solved this NP-hard problem with the combinatorial reinforcement learning algorithm.
- Evaluation results show that our solution decreases the cost by 67% without any sacrifice to accuracy.

### Respiratory Sound Classification

Healall, 06/2022 – 12/2024

*Robust Training and Deployment*

[2 × ICASSP '25]

- Built a cloud service to support the respiratory sound classification model.
- Transferred multiple models to respiratory sound classification, including ResNet, Glance-and-Gaze, Faster-RCNN, and Conformer.

### Deep Learning Model Acceleration

Tencent, 01/2022 – 06/2022

*Accelerating CNNs*

- Analyzed user data from Hupu and appended TFRecord to reduce the latency of model training.
- Implemented Faster-RCNN and deployed it with LibTorch and CUDA.
- Tested the latency and accuracy of object detection models on PyTorch, ONNX, OpenVino, and TensorRT.
